Remained unchanged, fire maple has been wanting to producing good cooker products for outdoor enthusiasts
Also has not changed, we constantly inject new inspiration for our products
In 2016, our wish not changed
Hope to be able to become one of the most popular outdoor brand in China and in the world
Fire maple, picnic equipment innovators

Fire-Maple
Your Mobile Kitchen

2010

2010, Variety of novelty stoves were developed and marketed, we took these stove attend Outdoor Show in China and overseas. With ten years of hard-work and research, our development and manufacturing technology has a qualitative leap. Be worth to mentioned it, we have the honor to take Fire-Maple FMS-100T titanium stove to join the Germany ISPO Gear Prize competition, this will be the first bold attempt in the China outdoor industry. "Fire-Maple, The innovator of camping equipment" is our determination of keep developing and creation.

2011

2011 have passed with many great achievement, the birth of several leading products show the exuberant innovation ability of Fire-Maple. FMC-XX6 Hurricane heat exchanger cookware get the affirmation on market very quickly with the superior performance of increasing 30% thermal efficiency and saving 30% fuel. FMS-117T Blade titanium stove weight only 98g and got the silver medal of "The Best Outdoor Equipment" in Asia Outdoor Show. FMS-118 Volcano stove was presented in the same time. FMS-F3 Engine fuel stove got much favourite attention by its fierce fire and good applicability. Lightweight cutlery series Dandelion face to world.

2012

Fire-Maple's products has been successfully "climbed" Mount Everest on 19/05/2012, the BianBaDunZhu cartridge climbing team took FMS-118 volcano stove with FMS-G2 gas and used at Mount Everest #4 campsite(altitude 7900M) and Attack camp (altitude 8300M), At present this is the using record of highest altitude in Fire-Maple stove range.

2012

At the end of 2012, compact structure and ultralight FMS-300THornet presented to the world and got the Asia Outdoor Industry Design Award 2012.

2016

In the past year we have quickened the steps of develop variety stoves to meet with different markets request, so here it comes, the FMS-125 & FMS-126, They were both provide a wind barrier around the burner top to keep it not be affected by windy; Considering the lightweight requirements, we try to keep the concise design but more emphasized on its practicability.

2001-2002

2001-2002, Mainly OEM the camping stove and cookware for overseas brands.

2003

2003, "Fire-Maple" Brand was built up for China Market, Fire-Maple is the first local brands which focus on outdoor field.

2004-2005

2004-2005, Keep improving products and continuing attend the "China International Sporting goods" Show every year. Sponsored Xiamen University Mountaineering Team to climb the Mount KYIZI Which is 6206M. They also brought "Fire-Maple" and bannered at MUSHITAGE mountain which is 7564M, they tested the products and it performance well on the extremely environment.

2006

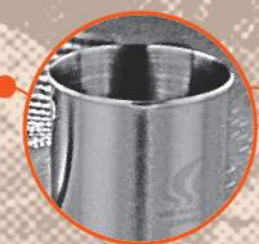

2006-2007, Hold the first "Outdoor Cooking Contest" and got attention & support by most outdoor enthusiasts, it enhance the impression of Fire-Maple as a local brands in the eyes of end users. At the same year, Fire-Maple was voted as the "Ten Famous Outdoor Brand" in China market. Through the market research, Our products are covered more than 70% in camping stove & cookware markets, became the leader in congeneric brand.

2008

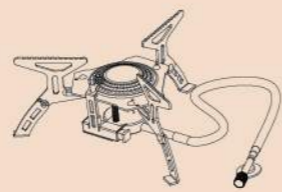

In 2008, The first home-made titanium stove FMS-116T came in to market, weight only 48g, it is the lightest camping stove in the world. FMS-116T, such a product with new concept and technology, won many awards in outdoor equipment field, includes Asia outdoor award.

2009

In 2009, after 2 years of market research and preparatory work, the new mobile kitchen brand BLACK DEER, mainly for family traveling and self-driving tour, was launched. BLACK DEER which contains twenty kinds of products, get a first wonderful appearance in the 4th Asian International Brand sporting goods show and sports fashion expo (ISPO China). It became one of the biggest highlight on the show, and been reported by many media.

8264 2011 Outstanding Domestic
Equipment Award

ENGINE

FMS-F3 FUEL STOVE

It uses butterfly shaped bracket, which withstand greater weight than normal legs, can be fit for various sizes of cooker, and meet single's or groups' cooking needs. The structure of FMC-F3 let it can be packed into bag and easy to carry.

Oil pump is a highlight of FMS-F3, which adopt lightweight and integrated design, weights only 47g, reducing users' load effectively. Compared with other pumps, the F3 pump made of high strength engineering plastics is more durable, can be used in various adverse outdoor environments.

Combustion Time

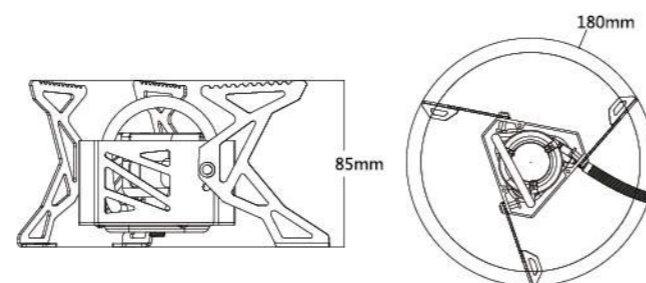

Boiling 1 liter water takes only 3'50"

Output 11170BTU/hr
Recommend fuel: #93 & #97 petrol

Product Specifications

Open : Ø180×180×85mm
Folded : Ø80×80×85mm
Weight : 321g
Material : Stainless Steel, Aluminum and ABS
Power : 3275W
Suitable : Extreme Explore

Product Introduction

• Adjusting firepower by this fire control knob.

• It uses butterfly shaped bracket, which withstand greater weight than normal legs, can be fit for various sizes of cooker, and meet single's or groups' cooking needs.

• It use with F3 stove, which adopt lightweight and integrated design, weights only 47g, reducing users' load effectively.

• It has strong firepower. In complete combustion stage, the flame was blue and no smoke. After use, no charcoal residue on the bottom of the pan.

• The pipeline of FMS-F3 adopts the latest heat-resistant and anti-oxidant rubber material, more durable.

• Come with 500ml fuel bottle lightweight and good sealing.

TURBO FMS-F5 REMOTE FUEL STOVE

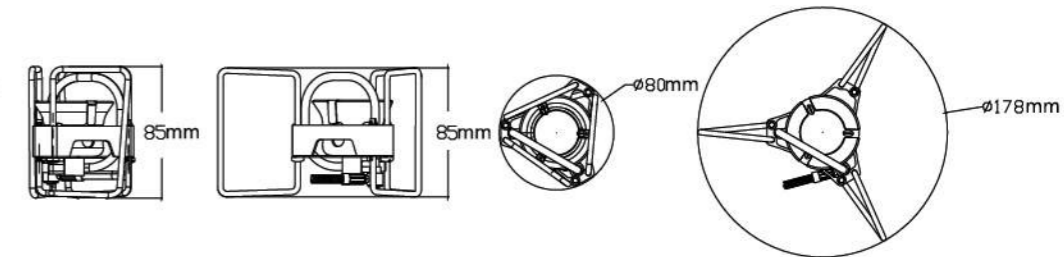

TURBO FMS-F5 REMOTE FUEL STOVE

Lightweight: The lightest fuel stove in the world, suitable for any kinds of activity.
Portable: Compact and in small volume
Stability: Concise structure promise low breakdown.
 Perfect adjustment control the power very fine and smooth
 Come with lightweight pump

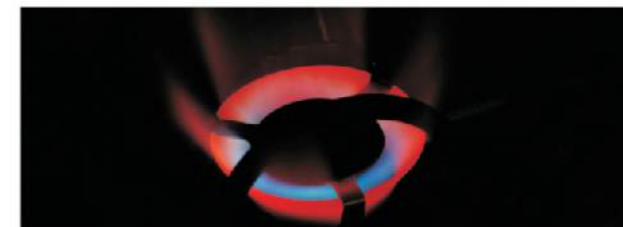

Provide a 330ml fuel bottle (FMS-330)
Recommend fuel: #93 & #97 petrol

Product Specifications

Open : Ø178×85mm
Folded : Ø80×85mm
Weight : 179.5g (stove), 47.7g(pump), 91.1g(330ml Fuel bottle)
Material : S/S, Aluminum, Brass
Power : 3200W

Combustion Time

Boiling 1 liter water takes only 3'50"

FMS-B330
330ml #93 petrol (1 hour)

Product Introduction

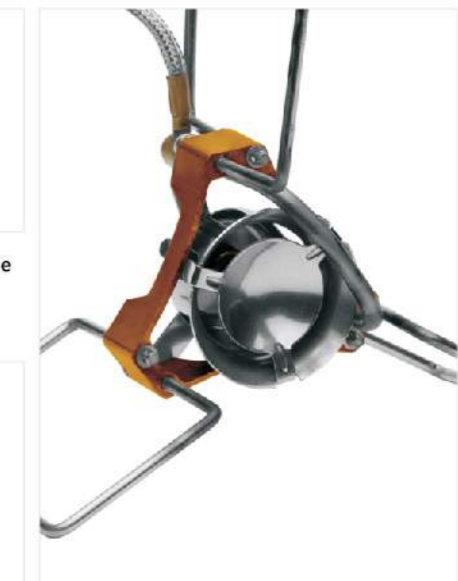

•Concise design but with stable support legs, it can hold 80kg.

•Lightweight pump and shock resistance, the handle can be bend and will not broken.

•Come with a 330ml fuel bottle, lightweight with good sealing, it suitable for any conditions.

•The stove suitable for using big pot after open the support legs.

STAR 2

FMS-X2 COOKING SYSTEM

Star2 , outdoor cooking system, suitable for Extreme Explore. It equals to a large volume cup that can hold standard 230g Gas Tank, Cartridge Stand and efficient Gas Stove equipped with piezoelectric system can use more convenient.

Star2, with heat exchange on the bottom of pot, it can enhance the heat efficiently , the pot come with a heat protection cover and it prevents heat from getting out . The fixed lock handle is easy to hold.

Star2, with an independent and foldable pot holder, which is suitable for various cookers.

Product Specifications

- Open :** Ø 254mmx265mm
- Folded :** Ø 133mmx205mm
- Weight :** 600g
- Power :** 1500 W
- Load-bearing :** 5kg
- 1L Boiling water :** 3'05"
- Suitable :** Hiking, Camping Cooking, Extreme Outdoor Activities
- Material :** S/S, Brass, Aluminum & Silicon

Combustion Time

FMS-G3(110G)
Approx.66 Min

FMS-G2(230G)
Approx.138 Min

FMS-G5(450G)
Approx.270 Min

Product Introduction

• Star cooking system is an advanced and quick cooking system

• Multi-use pot holder can be suitable for various specifications cookers

• Pot designed with fixed lock handle

• X2 designed with heat exchange on the bottom of pot, it can enhance the heat more efficiently.

VOLCANO

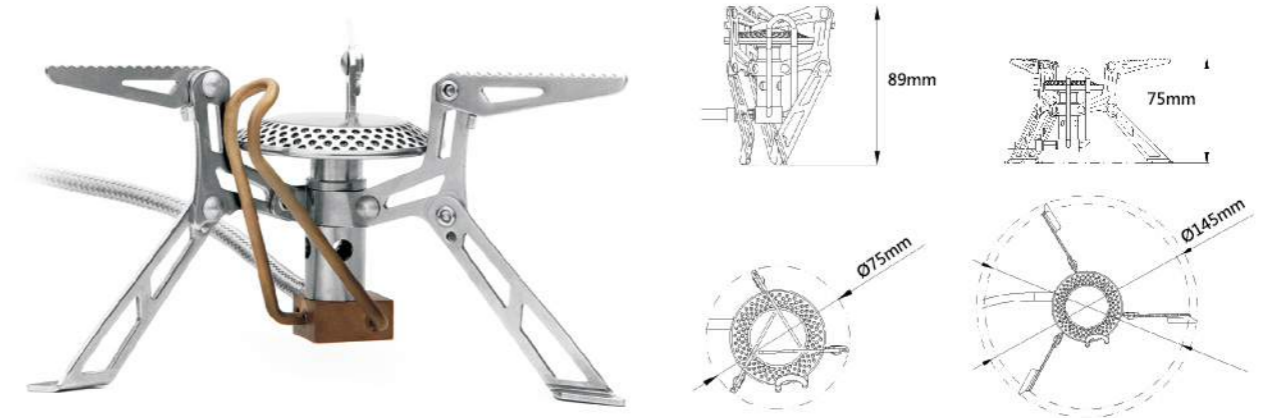

FMS-118 GAS STOVE

The main structure of FMS-118 is made of stainless steel. Unique preheat tube and big burner top can fully heat up the gas and provide strong firepower. It's fully representation the advantages of frugality.

Big burner top make sure even firepower and let users feel more comfortable.

The design of stove are more concise, lightweight and environment friendly.

Stainless steel supporters are simple but stable and well-made, it can support big pot.

VOLCANO

FMS-118 GAS STOVE

Product Specifications

Open : Ø145x75mm
Folded : Ø75x89mm

Weight : 146g
Material : Stainless Steel
Power : 2990W

Combustion Time

Boiling 1 liter water takes only 3'20"

FMS-G3(110g)
Approx. 33 Min.

FMS-G2(230g)
Approx. 72 Min.

FMS-G5(450g)
Approx. 136 Min.

Product Introduction

•Unique preheat tube design gets the fuel burning more strong and suitable for high attitude.

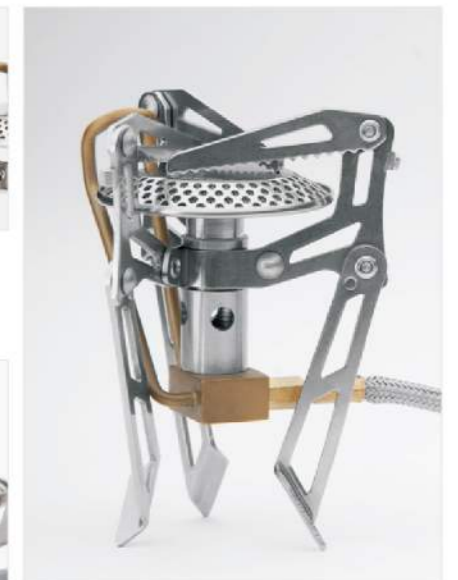

•With preheat tube the stove burning more sufficient.

•Only weight 146g and easy to carrying, it covers all traveling from daily travel to extreme explore.

•Big burner top makes sure the firepower strong and give you a good cooking feeling.

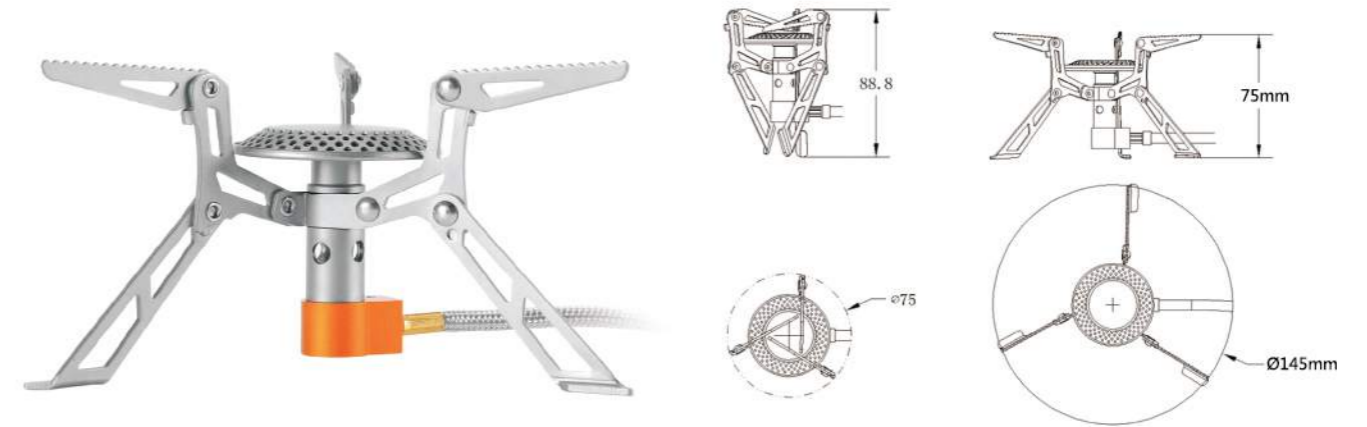

•High quality S/S support legs are simple but steady, with superior craft, it can hold large pot and use well in any kinds of cooking.

BLADE

FMS-117T TITANIUM STOVE

New design of ultralight titanium stove after our FMS-116T. The structure continue to use big burner top, match with the concise support legs based on titanium material, all these points gave 98g to this compact stove. Gas remote design, diameter of support leg is 145mm and the big burner top, all these advantage make the stove more functional.

BLADE

FMS-117T TITANIUM STOVE

Product Specifications

Open : Ø145x75mm
Folded : Ø75x89mm
Weight : 98g
Material : Titanium, Aluminum and Brass
Power : 2800W

Boiling 1 liter water takes only 3'25"

FMS-G3(110g) Approx. 35 Min.
FMS-G2(230g) Approx. 75 Min.
FMS-G5(450g) Approx. 144 Min.

Product Introduction

•Only weight 98g which thanks to the titanium material.

•New design of valve control made in aluminum material, it works perfect with color anodizing.

•Concise support legs, steady and durable.

•Diameter of support leg is 144.6mm with the big burner top, suitable from any environment. The power is equally distributed with big burner top and ensure the high heat efficiency.

•High strength gas tube is more light weigh and durable.

•Concise design , steady and reliable.

NAN JING CHINA

Asia Outdoor Industry Design
 Award 2011

KING KONG

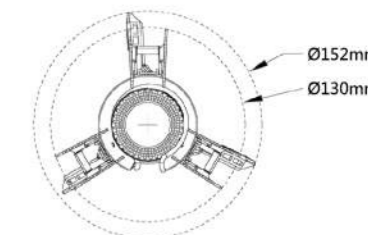

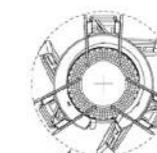

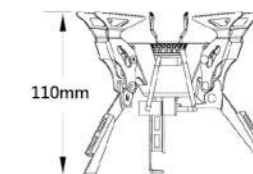

FMS-100T TITANIUM STOVE

Ti

The new model of 2010.

Major body of this stove is titanium and weight is less than 200g. The design maximize the flexibility and using area. Six foldable supporting legs makes the supporting range more large and make sure it is more steady. The total metal edges remind us of the transformers.

With two-channel preheat and windscreen design, this stove promise the most efficient and sufficient combustion and provide continual fire power.

KING KONG

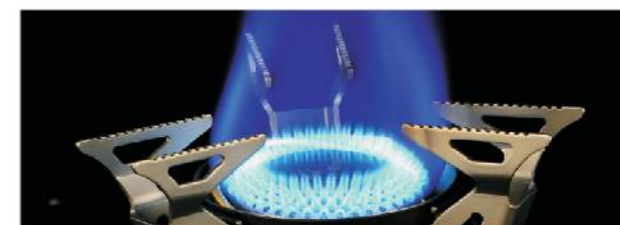

FMS-100T TITANIUM STOVE

Product Specifications

Open : Ø152×110mm
Folded : Ø97×70mm

Weight : 199g
Power : 2450W
Suitable : Extreme Explore

Combustion Time

Boiling 1 liter water takes only 3'55"

FMS-G3(110g)
Approx. 38 Min.

FMS-G2(230g)
Approx. 80 Min.

FMS-G5(450g)
Approx. 155 Min.

Product Introduction

•Weight is less than 200g,more portable to carrying.

•The knob of valve can control the power exactly fine and smooth.

•Six foldable supporting legs toward to three directions, ensure supporting and stability more better when using.

•Stove body can be used as a wind-screen and it is more efficiency when burning.

•With two-channel preheat, this stove promise the most efficient and sufficient combustion and provide continual fire power.

•FMS-100T is widely suitable for any environment, ensure the function is stable in high elevation and coldest environment.

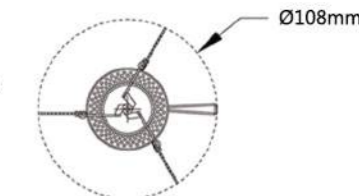

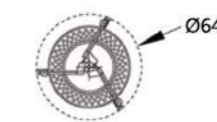

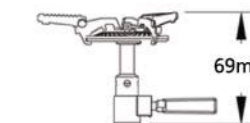

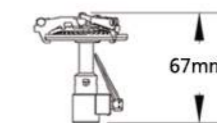

HEAT CORE

FMS-116T TITANIUM STOVE

Produced in 2009.

Inherited all the good points of FMS-116 such as big burner top and fire power, it is the perfect combination of straight flame and big burner top. The enlarging titanium support makes more stable and lighter.

HEAT CORE

FMS-116T TITANIUM STOVE

Product Specifications

Open : Ø108×69mm
Folded : Ø64×67mm

Weight : 48g
Power : 2820W
Suitable : Extreme Explore

Combustion Time

Max output 2820W Boiling 1 liter water only takes 3'30"

FMS-G3(110g)
Approx. 35 Min.

FMS-G2(230g)
Approx. 74 Min.

FMS-G5(450g)
Approx. 145 Min.

Product Introduction

•Only weight 48g because of the titanium material

•Package is a PC box, protect the stove perfectly when take along.

•The cookware stays more stabled when cooking, as the support legs come with tooth design.

•Big burner top still keep the strong power, it's a perfect combination of straight flame and big burner top, providing the higher efficient.

•In order to reduce the size and weight, we cut the valve in round style; The whole valve design makes valve more stability and durable.

•Concise design, steady and reliable.

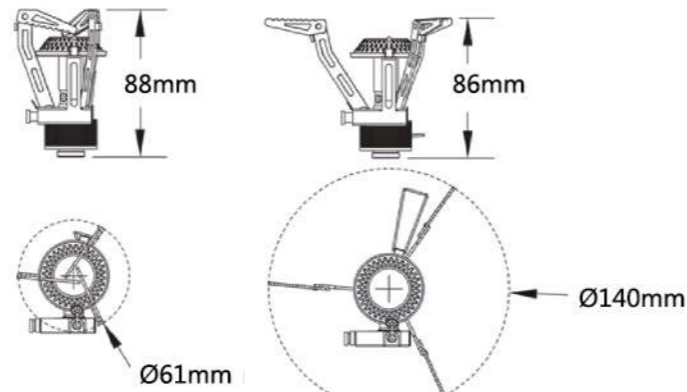

FMS-102 FOLDING GAS STOVE

Produced in 2003.
Compact and foldable, Made of aluminum alloy and stainless steel.
Equip piezoelectric system can light the fire successfully at one time.

Product Specifications

Open : Ø140×86mm Weight : 132g Suitable : Extreme explore
Folded : Ø61×88mm Power : 3050W

Combustion Time

Max output 3050W

Boiling 1 liter water only takes 3'25"

FMS-G3(110g)
Approx. 35 Min.

FMS-G2(230g)
Approx. 75 Min.

FMS-G5(450g)
Approx. 144 Min.

Product Introduction

•Compact and foldable, made of aluminum alloy and stainless steel, provide good supporting.

•Designed a ignition system to promise you a easy cooking life on outdoors.

•The cookware can be more stable when cooking as the support legs come with tooth design.

•Big burner top provide a strong and continuous firepower.

•Small valve with bright color design, offer you a durable and happy cooking time.

•The support legs have tooth design in order to increase the friction between pot and legs, make sure it performance well.

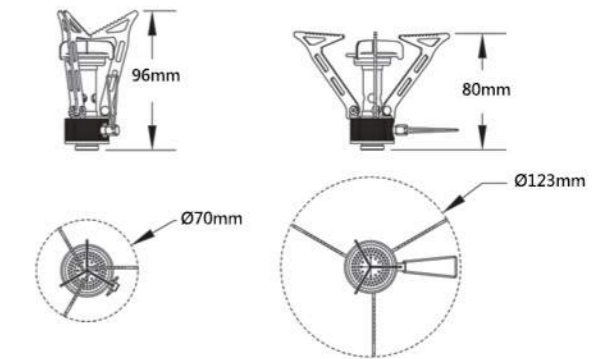

FMS-103 FOLDING GAS STOVE

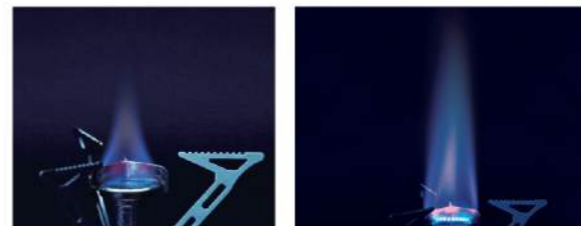

Produced in 2003.
Simple design, easy operation & maintain. Suit for high mountain. It can withstand a strong wind by the baffle on the burner top.

Product Specifications

Open : Ø123×80mm Weight : 103g Suitable : Extreme Explore

Combustion Time

Max output 3200W

Boiling 1 liter water only takes 3'55"

FMS-G3(110g)
Approx. 33 Min.

FMS-G2(230g)
Approx. 33 Min.

FMS-G5(450g)
Approx. 33 Min.

Product Introduction

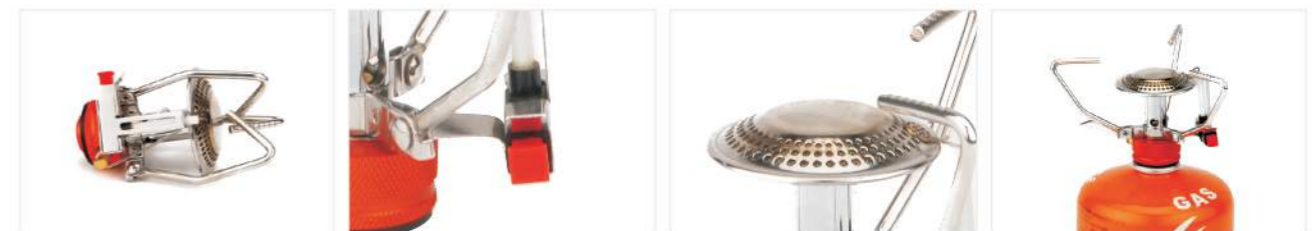

• Compact and foldable, made of aluminum alloy and stainless steel, provide good supporting.

• Designed a ignition system to promise you a easy cooking life at outdoors.

• Folding supporter can be taken down, reduce size and save space.

• There will be enough area for supporting after open support legs, the friction will be very nice with the design of groove.

Product Introduction

• Compact and foldable, made of aluminum alloy and stainless steel, provide good supporting.

• Designed a ignition system to promise you a easy cooking life at outdoors.

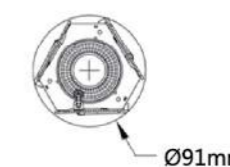

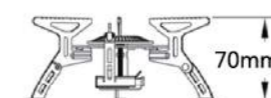

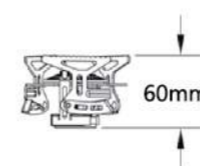

• There will be enough area for supporting after open support legs, the friction will be very nice with the design of groove.

• This stove is suitable for using bellow 4800m height.

FMS-105

FOLDING GAS STOVE

Produced in 2005.
 Unique, tough, steady and able to cook your meals in any rugged place. This stove can hold massive loads, and it will cooking very well for this stove have an ultrawide flame spreader.

FMS-105

FOLDING GAS STOVE

Product Specifications

Open : Ø174×70mm
 Folded : Ø91×60 mm

Weight : 237g
 Power : 2600W
 Suitable : Leisure & Travel

Combustion Time

Max output 2600W

Boiling 1 liter water only takes 3'50"

FMS-G3(110g)
 Approx. 36 Min.

FMS-G2(230g)
 Approx. 75 Min.

FMS-G5(450g)
 Approx. 145 Min.

Product Introduction

•The cookware can be more stable when cooking as the support legs come with tooth design.

•Wheel adjusting knob control fire power exactly fine and smooth.

•Burner top employed a flame design in convolute way, right size and high burning efficiency, it saves fuel at a certain extent.

•Designed a ignition system to promise you a easy cooking life at outdoors.

FMS-100

CAMPING STOVE

Produced in 2009.
Six foldable supporting legs and thickening S/S ensure the supporting and steady strength.
The total metal edges remind us of the transformers. With two-channel preheat and wind-screen design, this stove promise the most efficient and sufficient combustion and provide continual fire power.

FMS-100

CAMPING STOVE

Product Specifications

Open : Ø152×110mm
Weight : 308g
Folded : Ø97×70mm
Power : 2450W
Suitable : Extreme explore

Combustion Time

Max output 2450W

Boiling 1 liter water takes only 3'20"

FMS-G3(110g)
Approx. 38 Min.

FMS-G2(230g)
Approx. 80 Min.

FMS-G5(450g)
Approx. 155 Min.

Product Introduction

- It looks like the transformers in linkage folding supporters and the angular metal texture on surface.

- The knob of valve can control the power exactly fine and smooth.

- With two-channel preheated design, this stove promise the most efficient and sufficient combustion and provide continual fire power.

- The cookware can be more stable when cooking as the support legs come with tooth design.

- Six foldable supporting legs toward to three directions, ensure supporting and stability more better when using.

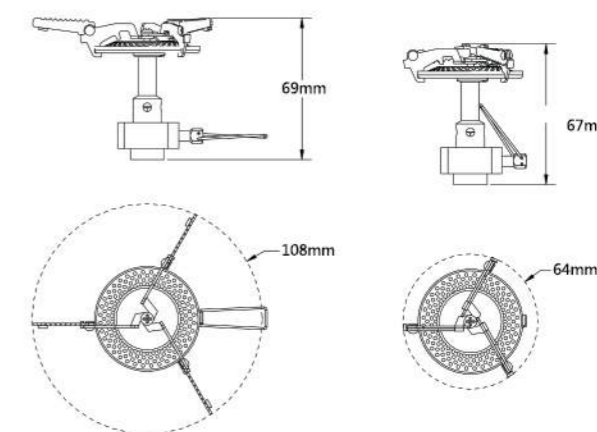

- It's very small after folded and easy to take away in a pc box

FMS-116

MINI STOVE

Produced in 2007.
 Ultralight stove only weight 73g but have egregious power. In small volume, Can be put into a pot with gas canister easy.

FMS-116

MINI STOVE

Product Specifications

Open : $\varnothing 108 \times 69$ mm
 Folded : $\varnothing 64 \times 67$ mm

Weight : 73g
 Power : 3000W
 Suitable : Leisure & Travel

Combustion Time

Max output 3000W

Boiling 1 liter water only takes 3'30"

FMS-G3(110g)
 Approx. 35 Min.

FMS-G2(230g)
 Approx. 74 Min.

FMS-G5(450g)
 Approx. 145 Min.

Product Introduction

•Level tooth design of support legs can increase the friction between support legs and cookware, make the cooker more stable.

•The size is tiny after folded, it can be put into pot together with gas canister easily.

•Instead of the round valve design, we use a square valve on this stove make it out of ordinary.

•We insist on using a big burner top to provide you strong and nice power.

•Concise design, steady and reliable.

FMS-706

GAS TORCH

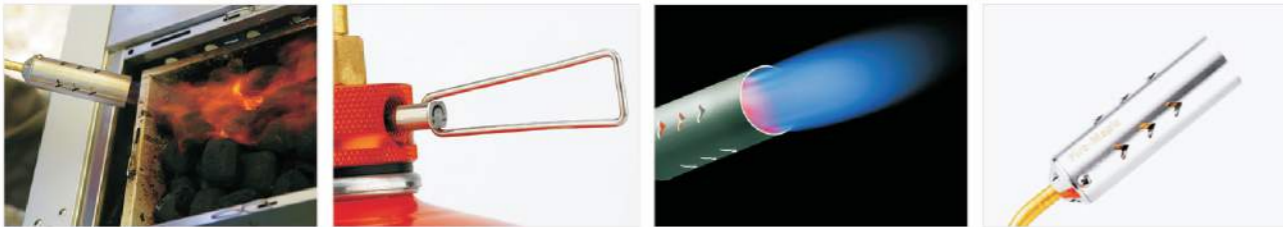

Product Specifications

Size : Ø190×110×30mm
Weight : 159g
Power : 4400W
Suitable : Leisure & Travel

Produced in 2009.
 This product is exclusively developed for outdoor use, please make sure not to use it inside building, vehicles or tents, as there is a danger of death by asphyxiation due to carbon dioxide poisoning or oxygen deficiency. Product Introduction

- This torch featuring as big power rate and fire power, and the temperature of the fire center can be up to 1300°C.
- Small valve with bright color design, steady and durable.
- Big S/S tube design offer you the strongest power.
- Brief design and performance perfect. Suitable for standard screw gas canister.

360° Blue-Flame Blowtorch

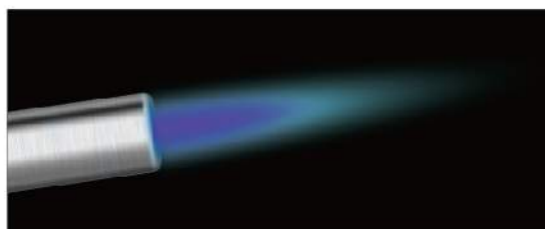

Product Specifications

Size : 160×35.5×55mm
Weight : 148g
Material : Stainless steel, Aluminum, ABS
Power : 2400w
Suitable : Outdoor fire, barbecue, thawing, bamboo and wood processing technology, baking cakes, etc

Fire-maple 360° Blue-Flame Blowtorch can be used on 360°, fire can be adjust small and big.
 Fire temperture can arrive 1400°C. Reference to human body engineering design of structures. Color from the color of nature.

Combustion Time

FMS-B330 FUEL BOTTLE

Product Specifications

Size : Ø66×165mm **Capacity :** 330ml **Weight :** 91.1g

Designed for FMS-F3 & FMS-F5 fuel stove, adopted high quality thicken aluminum, one body shape and large bearing design, which make the bottle more safety, durable and distortion resistance. It is also adopted specific oil rub resistance paint, which is anti-corrosion and durable.

FMS-B500 FUEL BOTTLE

Product Specifications

Size : Ø75×170mm **Capacity :** 500ml **Weight :** 126g

FMS-B750 FUEL BOTTLE

Product Specifications

Size : Ø72×250mm **Capacity :** 750ml **Weight :** 158g

BD-920

CHARCOAL GRILL

Product Specifications

Contains :
 Grill x1pc ,Cover x1pc , Gridx1pc ,
 charcoal container x1pc , bagx1pc
SIZE : 330x330x220mm 360x50x200mm
Material : Stainless steel
Weight : 1.8kg
Scope :Driving & Camping

Product Introduction

FMS-122

Alcohol Stove

NEW
PRODUCT

Simple structure of Alcohol Stove can make the alcohol vaporizing combustion and promote the burning efficiency.The supporting legs has the resistand-wind performance. Small size make it becomes the classic stove for easy taking. Whatever in outdoors for tea and indoors for cooking,it is the best helper.Also the alcohol fuel is very easy to get. Recommended:Liquid Alcohol make he burning efficiency more higher or Solid Alcohol.

FEAST COOKWARE SERIES

FEAST cookware is a new conceptual casual cookware series launched by Fire-Maple in 2012. Original designs of foldable handle with dazzling color makes you at ease and comfortable.

This series is purposely designed to a variety of combinations to satisfy the needs of traveling alone or with family.

FEAST RICE COOKER

Product Specifications

Open : Ø230×253mm
Folded : Ø230×165mm
Weight : 1140g
Volumn : 3.0L

Designed to make the most delicious rice in outdoor, uniform heating cooking pot wall more thick incense, non-stick coating makes it very easy to find the cleaning, suitable for family get behind.

- Pot body and the cover is 2.7 mm thick, rice more fully heated evenly absorb water, cooked rice is full of sweet and smooth.
- Health and safety of non-stick coating, rice is not easy to anxious burnt, and convenient to clean.
- With solid stainless steel handle, outdoor use more comfortable.
- Suitable for 4 ~ 6 people.

FEAST HOTPOT

Product Specifications

Open : Ø365×131mm
Folded : Ø270×116mm
Weight : 700g
Volumn : 4.4L

Feast chafing dish bring not only the warm fish ball instant-boiled mutton but also share More friend sitting around the happy time in the night sky drink chat.

- Outdoor special hot pot, big flat sharing food more happy.
- Double folding handle is stable and reliable, receive a smaller.
- Pot body with hard oxidation technique is also easier to clean and healthy.

FEAST K2

HEAT EXCHANGER COOKWARE

FEAST K2

HEAT EXCHANGER COOKWARE

Product Specifications

Frypan : Ø168×111mm
Capacity : 1.5L
Weight : 338g
Material : Hard Anodized Aluminum

From extreme explore traveling to family camping, you will always think about this cookware, simple design but practical. New folding way with lock of handle instead of traditional design, it's unique and lovely. Vent on lid can release vapour and promise you have a more safe cooking. With heat exchange system it can improve the heat efficiency around 30% and save a lot cooking time.

FEAST XT1

HEAT EXCHANGER KETTLE

FEAST XT1

HEAT EXCHANGER KETTLE

Product Specifications

Frypan : Ø153×86mm
Capacity : 0.8L
Weight : 242g
Material : Hard Anodized Aluminum

XT1 is the best gear when you want to drink tea or coffee, bottom with heat exchange use butt joint technics and improve the heat efficiency 30%, save 30% cooking time. Control the heat inside exchanger rings, it boiling water very quickly, you can drinking at anywhere as long as you want.

FEAST XT2

HEAT EXCHANGER KETTLE

Xt2 is designed for team using, bottom with heat exchange use butt joint technics and improve the heat efficiency 30%, save 30% cooking time. Control the heat inside exchanger rings, it boiling water very quickly, you can drinking at anywhere as long as you want.

Product Specifications

Frypan : Ø153×131mm
Capacity : 1.5L
Weight : 308g
Material : Hard Anodized Aluminum

FEAST T3

BACKPACK KETTLE

Bright color design & eye-attracting, made in aluminum material with hard anodized treatment on surface, safety and healthy. The whole kettle is only weight 182g, you can put in your backpack freely, durable and easy cleaning.

Product Specifications

Frypan : Ø153×73mm
Capacity : 0.8L
Weight : 182g
Material : Hard Anodized Aluminum

FEAST T4

BACKPACK KETTLE

Bright color design & eye-attracting, made in aluminum material with hard anodized treatment on surface, safety and healthy. The whole kettle is only weight 236g. Suitable for team using.

Product Specifications

Frypan : Ø153×116mm
Capacity : 1.5L
Weight : 236g
Material : Hard Anodized Aluminum

PRODUCT

FMB-913

ULTRALIGHT FOLDABLE TABLE-CICADA WINGS

Like Cicada's wings, this foldable aluminum table is very light in weight, the extreme simple design provides both stability and lightweight.

Ultralight : weighs only 388g, like Cicada Wings
Small : very small size after folding, suitable for carry everywhere in a backpack

Simple : only 4 parts, very easy to assemble

Convenient : packed in a lightweight bag

Product Specifications

Size : 360x250x100mm(unfolded)
 360x125x40mm(folded)

Weight : 388g(net)
 426g(with outer bag)

Material : hard anodized aluminum(the table board)
 Stainless Steel(the legs)

Load-bearing : 15Kg

Suitable : Leisure Travel

Product Introduction

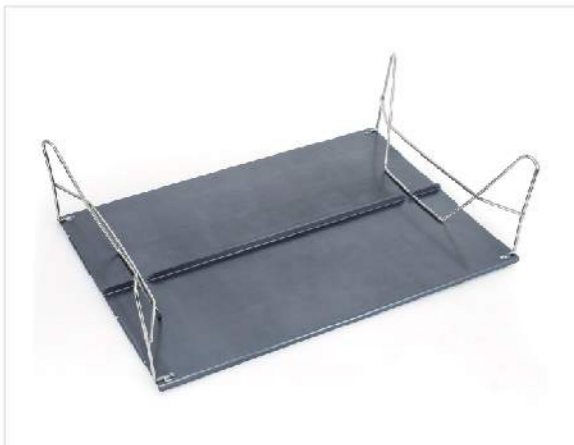

• Hard anodized surface, very tough and not easy to scrub

• Only takes 15 seconds for a single person to assemble

• Simple design, even a girl can operate

• S/S legs, can bear 15KG

• Only 40mm of thickness after folding, easy to put into a backpack, packed in a lightweight bag.

Cube Quick-Charging Lantern

It can be fully charged for 4 pieces of Iphone6s with choosing 9 pieces high power 5050 led and 6 pieces 10800mAh, Polymer Lithium Battery. The input and output all reach 5.0V/2.0A, so the charged cell phone will get double efficiency and high rate supplementary. Extending the design of Rotary Dimmer, hiding towering switch, so that the mode will adjust more accurate and interesting. It can avoid the loss of energy from the mistakenly touching with lock function. Inside with strong magnetic and 1/4 camera screw-thread connector and bring own ring, all these make Cube unlimited possible to fit the use environment.

Mobile Power Function
 Input: DC 5.0V/2.0A
 Output: DC 5.0V/2.1A
 Rotary Dimmer
 Lock Function
 Three speed brightness
 360° Lighting without blind area
 Connect with three spiders
 Magnetic connection function
 Waterproof level IPX4

Product Name: Cube Quick-Charging Lantern
Specification: 59.6 x 59.6 x 107.2 MM
Light Source: 9 pieces high power 5050 led
Color Temperature: 3500K
Battery: 10800mAh, Polymer Lithium Battery
Lighting Area: 30m²
Lighting Time: 1 Speed 400lm-15h
 2 Speed 160lm-35h
 3 Speed 60lm-135h
Way of Adjustment: Rotary Switch → 1 → 2 → 3 → OFF, with lock function
Input: DC 5.0 V/2.0 A Micro USB
Output: DC 5.0 V/2.1 A USB
Chargeable Time: 6.5h
Using Temperature: -30°C — +60°C
International Industry Waterproof Level: IPX4

Material: LEXAN ABS
Weight: 360g (Including Polymer Lithium Battery)
Place of Origin: China
Suitable: Daily & Camping

Product Introduction

About Input Output
 5.0V/2.1A
 USB Output supply electricity for outside equipment
 5.0V/2.0A Micro
 USB Input for charging lantern

Indicator Lights
 ① When the indicator lights light up, it means it begins to output electricity
 ② When the indicator lights begin to go out step by step, it means the decrease of the electricity
 ③ When the indicator lights is twinkling, it means the charging is beginning
 ④ When the 4 indicator lights all light up, it means the electricity is full charged.
 ⑤ When the 4 indicator lights begin to twinkle in the same time, it means the chargeable electricity is finished.

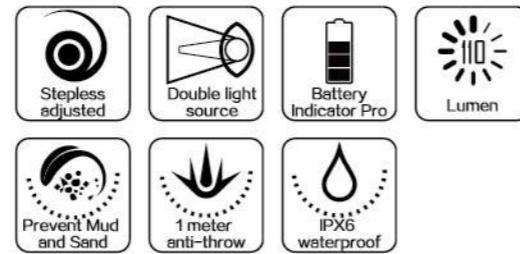

Various Use Environment
 ① Flat
 ② Hanging
 ③ Surface of indicator lights absorb Fe
 ④ Connect with three spiders

Wali

"Wali" Headlamp is suitable for using by professional outdoor people. It has two Optical System with Spotlight and Floodlight which make it can change quickly in the action and reduce the dangerous bringing by the complex geography. It can reach the unlimited dimmer when you press down the button gently. "Wali" get well balance between the weight, brightness, easy operation and long time for battery life which all these make it suitable for the needs → using of perfect outdoor activities.

> Brightness and Time: 18 Lumens (White) — 15h / 6 Lumens (White) — 50h / 5 Lumens (Red) — 62h

“ET” is a lightweight and easy-carry headlamp with reserving 8 years of the battery, which make “ET” can keep enough energy to deal with the unexpected dilemma. The irradiation distance can reach the surprised 2m, only weight 37g that is the best suitable for taking along as the spare light source.
